Essential oils can enhance your physical and emotional health. They are great for aromatherapy. Some essential oils can reduce the symptoms of depression and anxiety.

Essential oils are beneficial in many ways. They bring great help in maintaining a healthy and happy life.

This Essential oils set can be used in many different ways. You can inhale them directly out of the bottle or they can be dispersed with diffuser or humidifier. You can also dilute the essential oils with a carrier oil and apply to the skin. Another way is to add a couple of essential oil drops to a body wash, lotion, shampoo, or bath.

Essential oils should never be applied directly to the skin. They must be diluted with a carrier oil. A good proportion is 2-5 drops of essential oil to an ounce of carrier oil.
